

Technology continues to be a primary business driver within companies, translating into continuous projects, adjustments, and enhancements.

By using Signature Technology Group's Professional Services, organizations no longer have to spend their budget and resources to train staff on each new technology.

Get back time and focus on more important business operations.

Our services:

- Eliminate the need to train IT staff on every technological advancement.
- Reduce deployment time.
- Allow companies to remain focused on current tasks and operational efficiency.
- Provide dynamic and scalable experts on demand.
- Remove project management responsibility with accountability to end results.

Professional Services Overview

Signature Technology Group (STG), a Tech Data Company, delivers a variety of custom solutions for both hardware deployment and software implementations that ensure the successful operation of your technology environment. Our variety of professional services help businesses improve agility and performance. We leverage our experience and expertise to implement technology solutions while allowing our clients to reduce deployment time and focus on core operations.

Data Center Deployment

STG supports companies' IT environments with engineers certified to professionally install and integrate new equipment without interrupting current systems and environments. We analyze customers' business needs and use fixed-price quotes on IMAC-D (Installation, Move, Add, Change, and Disposal) projects to ensure desired results are achieved at the budgeted cost.

Software Implementation

Our expertise with productivity tools, virtualization, management, networking and storage, ensures full integration with your current IT infrastructure, while also being stable and scalable for your future plans. We specialize in solutions for prevailing technologies including Microsoft, VMware, Citrix, Cisco, NetApp and others. Our implementation methodology is a hybrid of onsite and remote delivery.

Consulting Services

STG provides custom consulting services to help solve critical client business problems.
